Sanchit Soni

Staff Product Designer @ Intuit
Quickbooks

A little about me

I'm currently designing innovative Agentic AI experiences for Intuit QuickBooks' mid-market customers as part of the Business Intelligence and Reporting team. My work focuses on Intuit Enterprise Suite, where I help build AI-powered solutions that enable growing businesses to unlock insights, automate reporting, and make confident decisions at scale.

I have 10+ years of experience across different SaaS verticals.

When I am not working, I like playing tennis and chess.
