

Trust via Chain of thought

The design displays the working Chain of thought, so that user can understand how system is determining the response in real time.

Summarize last year's performance compared to the prior year. What went well in 2025? What could be better? Please provide a detailed analysis that breaks down year-over-year income and expenses by quarter and compares them. Put the comparison in a table so it's easy to read.

Note for possible inaccuracy

In case user uploads their own data (spreadsheet, pdf, csv), we can provide a note hinting at possible inaccuracies and how they can leverage live connections to get more accurate responses.
